

Formtec

Create a convenient label using Formtec

Formtec

Formtec Label Technology

Face stock

Ninety-five percent of the Face stock is processed using natural pulp, resulting in strong durability and excellent printing expressiveness.

Formtec Labels has been granted a determination of conformance with human hazardous substance absence and management criteria by Korea Conformity Laboratories(KCL) in its analysis encompassing supplementary harmful substance categories(Halogen-free, Phthalate, Antimony), in addition to the foundational RoHS six substances.

Adhesive

Our label adhesive incorporates an environmentally-friendly emulsion adhesive that is validated by international certification organizations and aligns with global safety management regulations. It features excellent adhesion and cohesion capabilities, along with adhesive properties suitable for versatile attachment to different materials.

Release liner

For smooth paper feed in printing, we employ specialized coated paper with a high friction coefficient. This paper is used without encountering any curling issues and demonstrates remarkable dimensional stability. Additionally, it is an eco-friendly product made from non-fluorescent and chlorine-free materials.

Edge Finishing Technology

As a preventive measure against printer jam incidents, we incorporate Edge Finishing Technology to prevent adhesive exposure. This strategic approach aids in reducing errors that might arise during the continuous printing of a significant number of label sheets.

Formtec Certificate

Environmental Signature Certificate

Formtec labels are manufactured according to standards that consider both environmental and quality aspects. The majority of the raw material is natural pulp, and the labels are crafted using paper backing material with non-fluorescent and chlorine-free components, combined with an eco-friendly emulsion adhesive. Furthermore, through testing and validation in accordance with the quality standards of KS A 1518 (adhesive for printing), environmental requirements including the use of non-toxic adhesives, alkaline solubility, and alkaline dispersibility have been met. Formtec products are recognized as environmentally-friendly, enabling easy substrate recycling, waste reduction, and efficient resource reuse. As a result, they have received environmental certification from the Ministry of Environment.

(Certification Scope: Domestic LS•LQ Code Label papers, Selected Export Label papers)

“Korea Formtech's products are manufactured using FSC® certified materials and other controlled resources.”

(Certification Scope: Domestic LS•LQ Code Label papers, vellum label paper and coated label paper)

Design R&D Center

Formtec Design R&D Center serves as a trendy innovation hub focused on diverse design research and development, actively shaping the identity of the Formtec brand.

Formtec, in partnership with national public institutions and businesses, is dedicated to innovating while fulfilling the corporate social responsibility of the company.

**Formtec
B2B
Business**

Through research and development, we strive for exceptional quality, aligning our manufacturing, processing, and service procedures with international standards. We have enhanced competitiveness through collaborations among governments, businesses, and nations, focusing on strengthening our capabilities.

Formtec pursues the principles of Efficiency, Economical, and Enjoyable - the "3E" approach.

- We provide reliability and cost-effectiveness to meet the government's procurement demand goals.
- We maintain superior corporate credit and technological ratings for businesses.
- We uphold business processes that align with international standards, emphasizing quality, environmental concerns, and certifications.
- We expand the capabilities of R&D and design research and development to pursue diversity.
- Through collaboration with customers, we extend customized services.

Formtec

- Development of efficient Interfaces for Software (Formtec Design Pro, Design Easy)
- Office Printer Labels (A4/Roll), Business Roll Thermal Printer Labels
- Thermal Printer Labels for Shipping Labels (Government, Public Institutions, Korea Post, Courier and Logistics Companies)
- Business Printer Labels (Laser, Inkjet, Thermal Printer)
- Office Products (Color Laser Specialty Paper, Notepads, Coating Films, Adhesive Tapes)
- Customization (Tailored Label Production for Customers, Software Development Optimized for Custom Labels)

Formtec Label Software

Microsoft – Word / Access / Publisher, Even in Hangul and Computer Hangul, the Formtec product code is registered by default, enabling easy design and printing of Formtec labels.

Formtec Design Pro 9

Everything About Label Usage

Using various editing functions and print position adjustment capabilities, you can achieve intricate and precise label design and output.

Through features such as text, images, barcodes, tables, and serial numbers, diverse functionalities enhance the convenience of your tasks, elevating the value of label utilization.

With the utilization of Excel or Access data, you can swiftly and accurately output large volumes of data in sophisticated designs.

- Formtec label product codes are embedded, ensuring user-friendly operation.
- With user-friendly design editing features, you can easily generate labels of any type.
- Diverse usage samples and clip art are included, and label printing errors are minimized.
- The automatic postcode detection feature supports convenient postcode input for bulk address data.
- In addition to over 30 types of 1D barcodes, you can also edit and print 2D barcodes such as QR codes and data matrices.

Formtec Design Easy

Easily accessible for everyone

Formtec Design Easy software is recommended for individuals who are not familiar with computer usage or those designing labels for the first time.

We have designed an intuitive user interface focused on the most commonly used features.

With simplified functionalities and detailed explanations, anyone can easily and swiftly design and print labels.

Formtec Design Easy and Formtec Design Pro 9 design files are compatible with each other.

 **Software Download** ▶ www.formtec.co.kr

Formtec Roll Design Pro

Convenient roll labels

Formtec Roll Design Pro is a dedicated label editing software by Formtec Korea, specifically designed for roll labels. This software allows you to edit and print all Formtec roll label products (thermal paper / coated paper / NY white film paper).

The intuitive user interfaces of Formtec Design Pro and Formtec Design Easy have been designed not only for existing Formtec users but also for newcomers, ensuring easy utilization.

You can utilize commonly used elements in roll label printing, such as barcodes, QR codes, logos, and images, for editing and printing.

After installing the roll label printer driver provided by the roll label printer manufacturer, you can effortlessly design and print Formtec roll labels using Formtec Roll Design Pro.

Formtec Customer Support Services

Professional consultant services

Customer support center 1588-4952

At our Customer Support Center, we have skilled consultants who are dedicated to providing guidance on the appropriate usage of our products. They offer detailed information about software usage, printer-related instructions, and address inquiries to effectively resolve any questions you may have.

Customer Support Center Operating Hours: Weekdays from 8:00 AM to 6:00 PM
(Closed on Sat & Sun)

1:1 remote support www.formtec.co.kr/re

Our consultants can remotely access your computer screen to provide guidance on software usage and swiftly resolve printing-related issues, ensuring efficient solutions.

Software video manual

www.formtec.co.kr/mo

You can learn detailed usage instructions of Formtec Label Software, from basics to advanced levels. Educational files are provided along with the video.

Product utilization tips and videos

www.formtec.co.kr/use

You can explore various tips and videos on utilizing Formtec products.
*The video service is continuously updated.

Formtec My Sticker

Formtec My Sticker consists of a variety of colors and sizes of circular dot stickers and print-specific labels. You can manually write on them or print them to create personalized tags.

Roll-type / Circular color stickers

Formtec labels

offer a variety of colored labels made from glossy, transparent, translucent, and white film materials, in addition to regular labels. With a combination of various materials and convenient features like waterproofing and easy removal, Formtec products bring delightful changes to your everyday life.

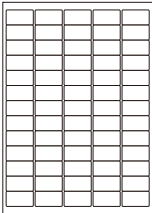

Laser Glossy Labels

Formtec glossy labels for laser printers provide a subtle shine, allowing for enhanced representation of sophisticated images when printed. These labels are more water-resistant than regular labels, ensuring longevity, which makes them suitable for branding purposes like barcode labels, as well as maintaining their appeal over time.
